RE: C-of-C / Certificate of Conformance , Ozone Depleting Chemicals Declaration

Please be advised the all NIC products containing Suffix "F" (refer to page 2) meet the EU Directive 2011/65/EU "RoHS 2", Directive 2015/863/EC "WEEE" restriction requirements as identified below:

Maximum concentration values (MCV) define the maximum amount of an individual restricted substance (per the EU RoHS directive) within each homogeneous material\* that compose the component.

RoHS RESTRICTED MATERIALS:	
Substance	RoHS LIMIT: MCV - Maximum Concentration Values
1. Lead (Pb)	< 0.10% = < 1000 PPM
2. Mercury (Hg)	< 0.10% = < 1,000PPM
3. Hexavalent Chromium (Cr VI)	< 0.10% = < 1,000PPM
4. Cadmium (Cd)	< 0.01% = < 100 PPM
5. Polybrominated Biphenyls (PBB)	< 0.10% = < 1,000PPM
6. Polybrominated Diphenyl Ethers (PBDE) **	< 0.10% = < 1,000PPM
7. Bis(2-Ethylhexyl) phthalate (DEHP)	< 0.10% = < 1,000PPM
8. Benzyl butyl phthalate (BBP)	< 0.10% = < 1,000PPM
9. Dibutyl phthalate (DBP)	< 0.10% = < 1,000PPM
10. Diisobutyl phthalate (DIBP)	< 0.10% = < 1,000PPM

\* - Homogeneous materials are defined as materials that cannot be mechanically disjoined into different materials and are "of uniform composition throughout" Types include: liquids, plastics, ceramics, glass, metals, alloys, paper, resins and coatings.

\*\* - Exemptions, as allowed within EU RoHS Directive, are listed for each NIC product series on page 2. Following the decision dated April 1, 2008 from the European Court of Justice to cancel point No. 2 of Decision 2005/717/EC, the substance, deca-BDE, will no longer be exempted (exemption 10a) in electrical - electronic components and goods as of July 1, 2008. This Certificate accounts for removal of this exemption and all NIC series listed as compliant are free of Deca-BDE

In addition to the above referenced RoHS materials, the above listed part numbers **do not contain:**

Perfluorooctane Sulfonates (PFoS), Chlorinated organic compounds, Polychlorinated biphenyls (PCB), Polychlorinated naphthalenes (PCN), Chlorinated paraffins (CP), Mirex (Perchlordecone) nor other chlorinated organic compounds, Tetrabromobisphenol-A-bis-(2, 3-dibromopropylether) (TBBP-A-bis) nor other brominated organic compounds, Tributyl tin compounds, Triphenyl tin compounds, Asbestos, Azo compounds, Formaldehyde

OZONE DEPLETING CHEMICALS DECLARATION: Halon 1301, Halon 2402, Carbon tetrachloride Methyl Chloroform CFC-13, CFC-111 CFC-112 CFC-211 CFC-212 CFC-213 CFC-214 CFC-215 CFC-216 CFC-217, (CCI3F) Trichlorofluoromethane (CC12F2) Dichlorodifluoromethane (C2F3Cl3) Trichlorotrifluoroethane (C2F4Cl2) Dichlorotetrafluoroethane (C2F5Cl) Monochloropentafluoroethane (CF2ClBr) Bromochlorodifluoromethane (CF3Br) Bromotrifluoromethane (C2F4Br2) Dibromotetrafluoroethane CCl4Tetrachloromethane (C2H3Cl3) 1,1,1-trichloroethane, (CF3Cl) Chlorotrifluoromethane 640 (C2FC15) Pentachlorofluoroethane (C2F2Cl4) Tetrachlorodifluoroethane (C3FC17) Heptachlorofluoroethane (C3F2Cl6) Hexachlorodifluoroethane (C3F3Cl5) Pentachlorotrifluoroethane (C3F4Cl4) Tetrachlorotetrafluoroethane (C3F5Cl3) Trichloropentafluoroethane (C3F6Cl2) Dichlorohexafluoroethane (C3F7Cl) Chloroheptafluoroethane

\* - Exemptions taken to achieve RoHS compliance:

- #7a - LEAD in high melting temperature type solders (lead-based alloys containing 85 % by weight or more lead)
- #7c1 - Electrical and electronic components containing LEAD in a glass or ceramic other than dielectric ceramic in capacitors (piezoelectric devices) or in a glass or ceramic matrix compound
- #7c2 - LEAD in dielectric ceramic in capacitors for a rated voltage of 125 V AC or 250 V DC or higher
- #7c3 - LEAD in dielectric ceramic in capacitors for a rated voltage of less than 125 V AC or 250 V DC.

\*\* - Identifies series previously taking exemption 7c3 and have since transitioned as of 1/1/2012 and no longer take exemption. For more information please contact NIC Environmental Compliance, [rohs@niccomp.com](mailto:rohs@niccomp.com)
